WCF服务通信的三种模式

请求/应答

单项操作

回调操作

Contract

```csharp
using System.ServiceModel;

namespace Demo.WCF.Callback
{
  #region Service contract
  [ServiceContract(Namespace = "http://xingyafei.me")]
  public interface ICalculator
  {
      [OperationContract]
      void Add(double a, double b);
  }
  #endregion

  #region Callback contract
  public interface ICallback
  {
      void GetResult(double result, dobule a, double b);
  }
  #endregion
}
```
